PROFESSIONAL SUMMARY

Results-oriented **AWS Cloud & DevOps Engineer** with **7 years of IT experience**, including **3+ years of hands-on experience** in AWS Cloud Infrastructure, DevOps, and Infrastructure as Code (IaC). Skilled in provisioning, automating, and managing secure, scalable AWS environments using **Terraform**, with hands-on experience across **EC2, VPC, IAM, RDS, ECS, EKS, ECR, S3, CloudFront (CDN), Route 53, CloudWatch, Lambda, SNS, and SQS**. Proficient in **Docker, Kubernetes, Terraform, Ansible, Linux, Git, Bitbucket, Jenkins, and GitHub Actions** for infrastructure automation and CI/CD pipeline implementation. Experienced in cloud operations, production support, monitoring, troubleshooting, incident and change management, with a strong understanding of AWS architecture, networking, and security aligned with **AWS Solutions Architect Associate-level concepts**.

EMPLOYMENT HISTORY

AWS Cloud & DevOps Engineer, HCL Technologies, Noida

01/2020 - Present

Roles and Responsibilities

- Managed hybrid infrastructure comprising **700+ servers** across **On-Premises** and **AWS** environments, ensuring **High Availability (HA), Scalability, Operational Stability, and Disaster Recovery (DR)** readiness.
- Provisioned and managed **AWS Cloud Infrastructure** using **Terraform** and reusable **Infrastructure as Code (IaC)** modules for **EC2, VPC, IAM, Security Groups, Route Tables, Internet Gateway, NAT Gateway, RDS, ECS, EKS, ECR, S3, CloudFront (CDN), Route 53, CloudWatch, Lambda, SNS, and SQS**.
- Built and maintained **CI/CD Pipelines** using **Jenkins, GitHub Actions, Git, and Bitbucket**, automating **Build-, Deployment, and Release Management** processes.
- Automated **Infrastructure Provisioning, Application Deployment, and Configuration Management** using **Terraform and Ansible**, ensuring standardized deployments across Development, UAT, and Production environments.
- Built and managed **Docker and Kubernetes** workloads on **Amazon ECS** and **Amazon EKS**, improving application scalability, portability, and availability.
- Designed and administered secure **Amazon VPC** networking, including **Public & Private Subnets, Route Tables-, Security Groups, Network ACLs, Internet Gateway, NAT Gateway, and IAM Roles, Policies, and Permission Boundaries** following **Least-Privilege** security principles.
- Configured **Amazon CloudFront (CDN)** with **Amazon S3** and **Route 53** for secure, highly available, and low-latency content delivery.
- Implemented **Infrastructure Monitoring, Dashboards, Log Analysis, and Proactive Alerting** using **Amazon CloudWatch, Dynatrace, and Nagios**.
- Administered **Linux-based EC2** instances, performing **Linux Administration, Package Management, Patching-, Troubleshooting, Performance Tuning, and Security Hardening**.
- Collaborated with **Development, QA, and Application Teams** to support **Cloud Deployments, Production Releases, Environment Provisioning, and Infrastructure Optimization**.
- Delivered **L2/L3 Production Support**, managing **Incident Management, Change Management, Root Cause Analysis (RCA), Preventive Maintenance, and Preventive Automation** while optimizing AWS resources through **Performance Tuning, Capacity Planning, Resource Right-Sizing, and Cost Optimization**.

- Maintained **Infrastructure Documentation, Deployment Procedures, Architecture Diagrams, Operational Runbooks, Technical Knowledge Base Articles, and Standard Operating Procedures (SOPs)**.

Core Tools & Technologies

- **Cloud Platform:** AWS (EC2, VPC, IAM, RDS, ECS, EKS, ECR, S3, CloudFront (CDN), Route 53, CloudWatch, Lambda, SNS, SQS)
- **Operating Systems & Scripting:** Linux (CentOS, Ubuntu, RHEL), Windows Server, Bash, Python
- **CI/CD and Version Control:** Jenkins, GitHub Actions, Git, GitLab, Bitbucket
- **Infrastructure as Code:** Terraform
- **Configuration Management:** Ansible, Chef
- **Containerization & Orchestration:** Docker, Kubernetes, Helm
- **Networking:** TCP/IP, DNS, DHCP, VPC, Route Tables, Security Groups, Network ACLs, Internet Gateway, NAT Gateway, Load Balancers, CloudFront (CDN)
- **Monitoring & Logging:** AWS CloudWatch, Dynatrace, Nagios
- **ITSM:** ServiceNow, Jira

Key Achievements

- Automated **AWS Infrastructure Provisioning** through reusable **Terraform Infrastructure as Code (IaC)** modules, improving deployment consistency, standardization, and reducing manual effort.
- Implemented **CI/CD Automation** using **Jenkins, GitHub Actions, Git, and Bitbucket**, streamlining **Build-, Deployment, and Release Management** workflows.
- Successfully deployed and managed **Containerized Applications** using **Docker, Kubernetes, Amazon ECS, and Amazon EKS**, improving application scalability, portability, and availability.
- Enhanced **Infrastructure Monitoring and Operational Visibility** through **Amazon CloudWatch, Dynatrace, Nagios, Log Analysis, and Proactive Alerting**, reducing **Mean Time to Resolution (MTTR)**.
- Standardized **AWS Cloud Infrastructure** through reusable **Terraform** modules and optimized cloud resources using **Performance Tuning, Resource Right-Sizing, Capacity Planning, and Cost Optimization**.
- Maintained **High Availability and Service Reliability** by delivering effective **L2/L3 Production Support, Incident Management, Change Management, Root Cause Analysis (RCA), and Preventive Maintenance**.

Server Administrator (Deployed at HCL Tech), Collabra Technologies, Noida

05/2019 - 01/2020

- Provided **day-to-day server administration** (Linux & Windows), including user management, patching, backup, and troubleshooting activities.
- Monitored **datacenter operations**, ensuring uptime, availability, and compliance with ITIL practices.
- Performed routine health checks of servers, storage, and network devices, escalating issues to L2/L3 teams as needed.
- Handled **incident management and service requests** within defined SLAs, ensuring minimal downtime for business-critical systems.
- Supported **hardware lifecycle management**, including server provisioning, decommissioning, and asset tracking.
- Collaborated with HCL Tech teams on **change management**, maintenance windows, and upgrade activities.
- Gained exposure to **datacenter best practices** like environmental monitoring, physical security, and disaster recovery readiness.

EDUCATION

**Bachelor of Technology in Electronics and Communication,
Abdul Kalam Technical University (AKTU), Ghaziabad**

07/2015 - 07/2019

Higher Secondary (12th Grade), L.K International School (CBSE Board), Ghaziabad

07/2014 - 07/2015

CERTIFICATIONS

HashiCorp Certified Terraform Associate 003 Course - Udemy

DevOps Course Completion Certificate

DFS-Support/Administrator Beginner -GEN AI L2

Gremlin Enterprise Chaos Engineering Certified (GECEC)

INTERPERSONAL SKILLS

- Cross-functional Collaboration
- Analytical Problem Solving
- Effective Communication
- Stakeholder Management
- Documentation & Knowledge Sharing
- Adaptability in Agile Environments

LANGUAGES

English

Hindi

HOBBIES

- Reading tech/science content to stay updated on innovations.
- Traveling to explore cultures and broaden perspective.
- Creative expression through poetry and music.
- Attending workshops/seminars on emerging technologies.
- Mentoring and knowledge sharing within professional networks.

ACHIVEMENTS

Operational Efficiency and OS Upgrade Projects | HCLTech, Noida

06/2025 - 06/2025

Certification of Appreciation - Cloud Operations | HCLTech, Noida

12/2022 - 12/2022

PORTFOLIO & SOCIAL LINKS

DevOps Portfolio (Live Projects + Certifications)

- Designed and deployed a responsive DevOps portfolio using HTML/CSS and JavaScript.
- Showcases CI/CD, AWS, and Kubernetes projects with live GitHub integrations
